

Community Re-Leaf

The Independence Parks and Recreation Department is launching a program as a way to get community members, organizations, and businesses involved in tree planting within the Independence Park system. Through donations, the Community Re-Leaf program will plant trees to help make Independence a greener community. For each \$5.00 donation to the program a tree be planted in your name and mulched with a tree protector. The Independence Parks and Recreation Department will keep track of all of the donors and list them each year in the Parks and Recreation Activities Brochure. Think of this as a way to lower the carbon footprint by planting trees sponsored by you, your organization, or your business. Once the Community Greenhouse is operational tree planting will happen in both the spring and fall. The type of trees and location will be based on need and will be selected by Parks and Recreation personnel.
